

Youth Events

Presenting programs for the youth is a vital part of the Wonders of Science ministry. While it can be somewhat intimidating to be introduced to a group of shouting, singing, screaming teenagers, when Dr. Ortner begins his special youth events, all is silent in the auditorium. That is...until the air is ripped apart with over one million volts of manmade lightning!

Dr. Ortner presents at a local university in California.

The "Science Guy" is a great draw as an outreach for the teens. Here is a program for which they're not too embarrassed to invite their friends where volunteering is a cool thing to do. Everyone wants to be involved.

The program creates a high level of interest for any age group through illustrations from God's creation. Listeners are encouraged to think critically and understand the importance of being in tune with God's available power.

If you would like to bring "Wonders of Science" to your school, camp or community, contact us today.

These goggles turn the world upside down.

Meet Dr. Ortner

Dr. Dean Ortner is the eldest of eight boys whose parents were both professors in the fields of rocket science, metallurgical engineering and math. At age nine, showing a precocious inclination for education, Dean designed an analog computer to help with his math homework.

Dean began his university training at age 15 in aeronautical/electrical engineering, designed and built his own plane, then transferred to medicine and bio-nucleonics. On two occasions, he studied opera and art through the Sorbonne, Paris.

He assumed a faculty position as a research scientist at North Dakota State University teaching post-doctoral students in advanced surgical techniques, medical entomology/toxicology and instrumental analysis as well as brain surgery on mosquitos.

He has guest lectured at Johns-Hopkins Medical School, Harvard, Princeton, Purdue, Virginia Tech and Georgia Tech among others under the auspices of the Staley Lectureship series for visiting professors. His second doctorate is in the field of Humanities after his professor parents urged him not to become only trained, but educated. His love for languages encouraged him to study French, Spanish, Hungarian, German, Japanese and Chinese.

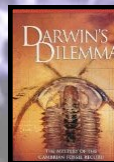

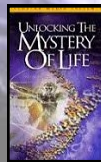

Author: Published four books, a fifth being edited

Pilot: Checked out in the T-34, T-37, and F-18

Military: Commissioned as Lt. Col. USA Airborne (Hon.)

"...bringing life to science"

WONDERS OF SCIENCE

Dr. Dean Ortner
"Million Volt Man"

As Seen on Ripley's Believe It or Not?

Can You Answer This Question?

Which one of the following experiments will you find at a "Wonders of Science" program series?

- A cry that can shatter glass?
- Metal rings that defy gravity?
- Music on a laser beam?
- A frozen shadow?
- Liquid light?
- A talking flashlight?
- One million volts passing through a man's body, causing a board to burst into flames?

If you answered "all of the above"...you are right! You'll experience all this and more! The "Wonders of Science" program is a dramatic live presentation that demonstrates the power and design of natural law with challenging insights into the mind and character of its Creator.

Neighborhood block parties

TYPICAL VENUES INCLUDE:

- Military installations
- Youth camps/retreats
- Weekend seminars
- Civic Halls
- Science camps
- Senior centers
- School Assemblies
- Dinner theaters
- Convention Keynote
- Workshops
- All night graduation celebrations!

Camp attendees enjoy a break between science sessions.

What is Wonders of Science?

Dr. Ortner addresses 4,000 Cadets & Officers at the Air Force Academy.

by over 1/2 billion, including "Ripley's Believe It or Not" premier and reruns.

Dr. Ortner has been traveling extensively for over 40 years presenting "Wonders of Science" to crowds as large as 37,000 and to as few as six military at a remote radar site.

There has been a military connection for WOS since its inception to reach hundreds of thousands of troops away from home.

The demonstrations have been presented at all four military academies, the Pentagon, several World Fairs, Olympic Games and even to Ronald Reagan's Presidential support staff at Camp David.

Optical illusions even baffle scientists.

The "Wonders of Science" concept began as a young pastor sought to interest youth through science. Seen live by over 8 million and via international network TV

Dr. Ortner poses with a missile security unit.

Comment Corner

"On behalf of all of us here at West Point, I wish to express our appreciation for your messages, which were both interesting and inspiring, renewing and revitalizing the faith of many of our people. I am particularly grateful!"

-- Brigadier General, West Point --

"You have probably saved my life! I was going to attempt suicide last week when someone paid my way to this summer camp. Your programs have saved my life as well as pointed my soul to Jesus. I now know that I am special to Him and He wants me alive to relate to other troubled teens that I hang with. Thank you for being here for me!"

-- A Teenage Camper --

"Rarely in my experience have I ever seen such rapt attention to God's truths. You presented Bible truths with such conviction and with such incredible illustrations."

-- Camp Director --

"The 'Wonders of Science' program that was brought to our church was fantastic. Our church seats 1,400 people and we packed in 1,700 for the service. It was the best attended program we have ever had."

-- Pastor --

"You packed in so many nuggets of truth during your demonstrations that I could hardly write fast enough."

-- Parent --

"Dr. Ortner was able to present a program which was interesting, informative, enjoyable and educational. Potential religious materials/spiritual implications were presented in an appropriate manner. It was one of the most outstanding programs for students I have ever attended in more than twenty years of school administration!"

-- Headmaster, public school --
