WONDERS OF SCIENCE

“... bringing life to science”

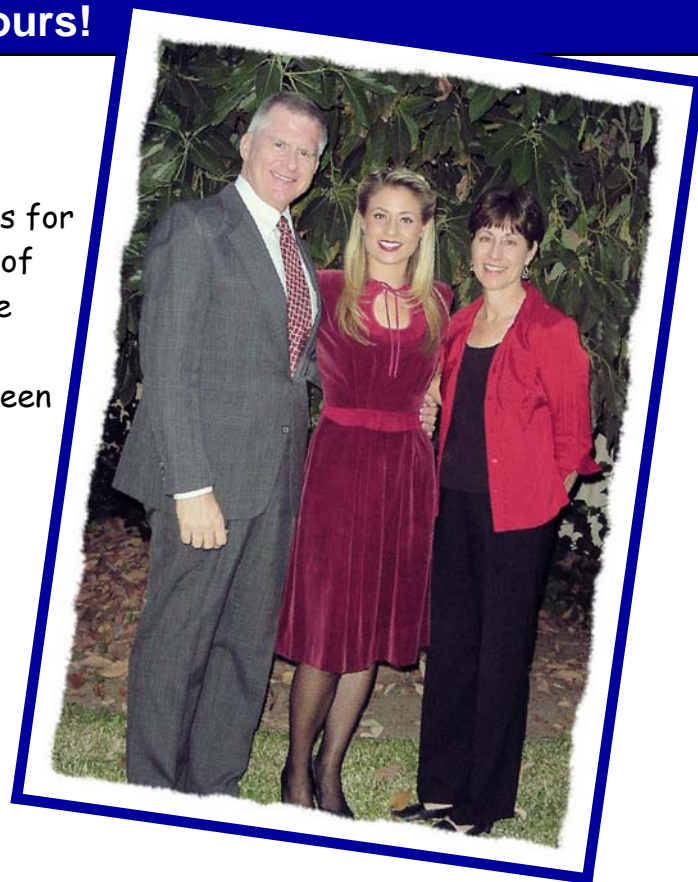

WONDERS OF SCIENCE IS A MINISTRY OF WHITTIER CHRISTIAN SCHOOLS

Merry Christmas from Our Home to Yours!

Dear Friends and Family,

Words are so inadequate to express our thanks for your faithful prayers and support on behalf of the Wonders of Science ministry. This year we have experienced more variety in the ministry than we've seen in a long time. Response to the programs has been heartwarming! Truly the Lord continues to breach the walls of unbelief and bring those seemingly unreachable hearts into His family through the unique WOS presentations. Our Christmas gift to you would be the share you have in partnering with us for those precious souls. Eternity will be even more exciting just to hear their stories.

Love, Dean, Terry and Stacy

Our daughter, Stacy and her fiancé, Tim.

FAMILY NEWS

Regular readers of the WOS Newsletters already know of the wonderful year of ministry the Lord has provided for us (see www.wondersofscience.org). We thank the Lord for providing such faithful supportive friends who make it possible.

One highlight of our return to Whittier was a request from Tim Valencia for permission to ask our daughter Stacy for her hand in marriage. We were thrilled! From the day our children were born, we've prayed that the Lord would bring the right godly person along at the right time to share in our children's lives of ministry. A fall wedding is being planned.

Chino Hills Science Day!

Wonders of Science was privileged to be included among a dozen or so scientists and doctors from local universities for an all-day series of presentations to the public school students and parents of Chino Hills, CA. Each group alternated through sessions of their choice as we introduced various areas of interest in the sciences. My unique presentation was aimed at tying the fields all together into a cohesive whole orchestrated by "you know Who." I left little doubt without coming right out and saying it.

One of the presentations at Chino Hills school.

The crowd's response was heartwarming. Comments overheard like, "We've got to get this guy back!" confirmed a real interest in what we had to share.

I'm grateful to Carol, a former colleague's fiancée who was instrumental in getting us included as a speaker.

Whittier Christian School Elementary has an annual community outreach that turns the school playground into an amazing assortment of activity booths, bazaars, and in my case, a mini Wonders of Science presentation. As soon as I set off the Million Volts the crowd gathered to watch various demos. The most popular, of course, were those involving participants.

PTF Family Night

COMMENT CORNER...

"I have a 13 year old son and I can't keep him still in church. Tonight he was riveted to his seat for 90 minutes and is asking if we can come back every night! Thanks for an outstanding program that honors the Lord!"

-- Excited Father --

"Did you see that guy's show? We've just got to get him back for our students next year!"

-- Public School Principal --

"I've been praying for my entire life that my best friend would hear about Jesus and believe like I do. I just wanted you to know that my friend prayed with you last night to get saved! Now we are really sisters! Thank you for not being afraid to tell about the Bible."

-- 9 Year old Attendee --

Chapels

There are times when an entire student body does not fit in a single room for a chapel service, so, outside we go. Here in Southern California the weather is usually cooperative so we made a picnic out of it. One of the principals commented that it was so unusual to see the entire school's student body sitting quietly in rapt attention to what was being said. I credit their teachers with good classroom instruction in manners.

The students (and teachers) enjoy being part of the demos during the presentations.

BE INVOLVED!

- Pray for continued contacts and opportunities to share the Gospel through Wonders of Science.
- Pray for Dean and his teaching responsibilities.
- Pray for the Lord's preparation of hearts and souls of program attendees.
- Pray for continued financial provisions that make the ministry possible.
- Thank you to all our faithful prayer and financial support partners!

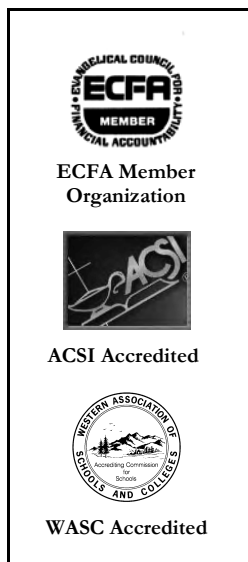

Wonders of Science
Counts on You!

Thank you to our Support Team!

Anyone who has watched a space launch knows that the few astronauts in the capsule are there because of the tireless efforts of thousands. The astronauts get the brief publicity and accolades, but the real credit should always go to the support staff. So it is with Wonders of Science.

Terry and I are only free to be able to minister to the public because of the quality support we receive from our team at home. Without them, very little could be accomplished because we'd be limited in the time available for the presentations.

Our Central Administration staff, (from left Debbie, Amy, Donna, Laura, Karen and in front, Jennifer) handles the many legal requirements for insurance, payroll, donations, receipting and budgeting.

Our Office team, (from left, Cheri, Monique, Lindalee, Andrea and in front, Rene) handles the mail, national and international inquiries for invitations, local public contacts and helps us integrate the programs with schools.

Our Executive Assistant, Debbie, takes care of the web page, all our purchase orders, newsletter layout and the ever-popular annual Science Camp.

Our sincerest thanks to an incredible staff.
